Waisl

RE-ENGINEERING POSSIBILITIES

WAISL is a trusted digital transformation partner, delivering smart, seamless, and secure solutions. With expertise in AI, Managed IT, Smart Infrastructure, we help enterprises boost efficiency and enhance experiences. We are here to empower enterprises with future-ready growth!

TURNWISE

WAISL's advanced Digital Twin–enabled solution for end-to-end, visible, & data-driven airside operations.

Resource allocation and utilization

Safety monitoring & compliance

Real-time airside decision-making

Ground handling & ramp operations

Benefits

Airlines:

Airlines leverage AI-powered turnaround time management to lower fuel, crew, and gate costs. This reduces delays and disruptions while improving resource utilization.

Airports:

Airports achieve higher efficiency with real-time aircraft and vehicle monitoring. AI-powered insights optimize resource allocation, reduce congestion, & keep airside operations running seamlessly.

Ground handling Agents:

Ground handling agents improve SLA compliance & reduce operational uncertainty. AI-driven scheduling, smarter workforce planning, & enhanced turnaround management boost efficiency at every step.
